

# MOP Contracts

**Lumina Energy offer 5-year Meter Operator (MOP) contracts through a designated MOP for Half-Hourly electricity metered supplies.** A MOP contract is a legal requirement for all Half-Hourly electricity supplied meters and covers; meter maintenance, meter fault fixing and the necessary telecommunications for sending your consumption data to your energy supplier.

MOP contracts can be secured for periods of between 1 and 10 years, however the cost of metering compared to the cost of electricity supply is relatively small and it is not financially beneficial to revisit the metering contract on an annual basis.

## Key benefits

- ◆ Ensure legal requirements are fulfilled.
- ◆ Ensure long-standing maintenance of your electricity meter.
- ◆ Secure the charges associated with your meter for a period of 5 years.
- ◆ Avoid variable Meter Operator charges, which are typically a higher cost.
- ◆ We manage the administration of securing your MOP contract.

## How the service works...

1

We will first require a signed Letter of Authority from the customer.

2

We will then confirm who your current MOP is and your contract end-date.

3

When there is 6 months or less left on your existing agreement, we'll offer you a new contract.

4

When you sign and return your MOP contract, we will process this with the new Meter Operator to confirm it is secured and ensure the contract goes live within 12 weeks.
